

“With about 5 minutes of training, I was able to build my own ad-hoc financial reports.”

- Linda Hill  
CFO  
G2 Secure Staff

 BizNet  
**BizExcelerator**<sup>™</sup>

Financial reporting made simple, powerful and accurate.

***Unleash the full power of Excel!***

The BizNet BizExcelerator<sup>™</sup> is an Excel-based financial reporting and analytics product that delivers simple, yet powerful, financial reporting and analysis capabilities to accountants. The BizExcelerator<sup>™</sup> makes it easy for accountants to gain immediate control of the entire financial reporting and analysis process by ensuring data from the G/L ties to data in Excel.

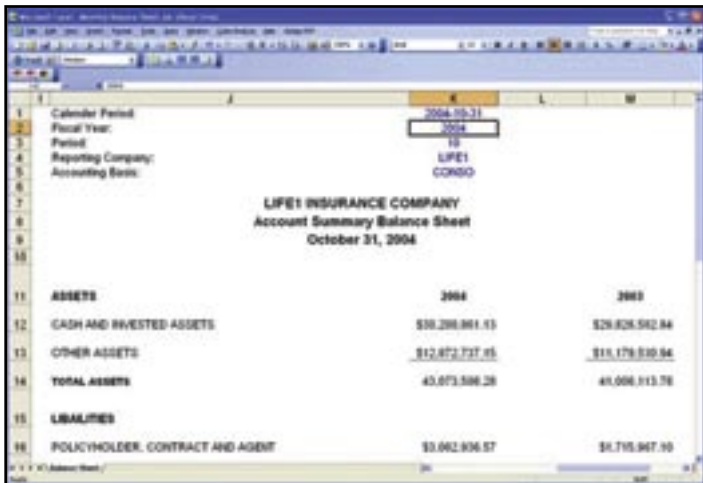

- Ensures Data in Excel is Accurate
- Create Reports in Minutes, not Days
- Reduce the Month End Close
- Leverage Time Invested in Existing Spreadsheet Reports
- Answer Business Questions Immediately with Multi-Dimensional Drill Down

G/L Reporting Made Simple, Powerful and Accurate

### Direct Link to your General Ledger Data

The BizNet BizExcelerator™ directly integrates your G/L to Excel, removing the need for a data warehouse, providing accountants with the assurance that data in Excel always ties to the G/L.

Your G/L data is integrated directly into Excel for streamlined financial reporting, eliminating the need to export data to Excel.

### No Exporting Data to Excel

The BizNet BizExcelerator™ makes it easy for accountants to produce accurate financial reports with detailed audit trails – without having to export data from the G/L to Excel.

Since the BizExcelerator™ pulls data directly from the G/L into your Excel spreadsheet via functions linked to the database, users can easily create report templates in minutes that refresh with a click of a button.

### Powerful Reporting Capabilities

With the BizExcelerator™, you have complete access to your General Ledger data. End users simply enter a BizExcelerator™ function (such as month-to-date net, or year-to-date beginning balance, etc.) and the latest data from your G/L will automatically populate within Excel.

Powerful dashboards can be created directly in Excel, and refreshed with a click of the mouse.

As soon as an entry is posted within the G/L, you can refresh your Excel spreadsheet and see it. Reporting on your General Ledger data is simple, powerful, and accurate.

And because the BizExcelerator™ takes advantage of native Excel, companies can make better use of their existing spreadsheets and no longer have to rely upon a single power report builder to create new reports.

### BizNet BizExcelerator™ Advantages:

#### Simple

- Easy to Install (Installs within minutes)
- Directly integrated to MAS 90/200/500 systems
- Easy to use (Little or no training required)

#### Powerful

- Drill to account detail, journal entries, accounts payable (All within Excel)
- Multi-dimensional analytics
- Utilize MAS500 account groups
- Charting, Footnotes, Wildcarding, Account Ranges

#### Accurate

- Post journal entries into SAGE and have the information reflected in reports
- Leverage existing spreadsheets (Convert existing spreadsheets into live reports directly integrated to MAS90/200/500)
- Reduce closing cycles by days
