

Count on AvaTax ST™ to take the worries out of sales tax compliance.

Dealing with sales tax doesn't have to be time-consuming and error-prone: AvaTax ST makes it simple.

>> Your challenge.

For companies doing business in a myriad of jurisdictions, sales tax compliance is a complex nightmare. For protection against the consequences of non-compliance, large corporations with IT and tax departments deploy expensive, complex software systems. The alternative - manually researching and maintaining rates - is the worst-case scenario in terms of audit risk. But what happens when your business can't afford or staff for such IT-intense "enterprise" software systems?

>> Your solution.

Avalara makes automation for *any* business simple, with AvaTax ST: a hosted, Web-service-based solution that automatically performs address validation, sales tax jurisdiction research and rate calculation - all on the fly within your accounting application, with no change to your existing workflow. Fully-detailed reports are always at your fingertips, and returns are automatically pre-populated and generated.

It's easy: AvaTax ST takes just minutes to download and install. Set up nexus and taxability, and begin accessing Avalara's professionally-maintained tax engine over a secure internet connection to apply address, jurisdiction and rate information to every transaction - within the same order-entry or customer set-up screen you've always used.

Integrated editions are available for QuickBooks®, Great Plains®, Navision®, ACCPAC Advantage Series™, MAS 90® and MAS 200®, among others (see back for complete list). Or, with Avalara's AvaTax On-Demand™ a developer can integrate the Avalara Web Services API to any e-commerce, third party or custom-built accounting application with use of a comprehensive Software Developer's Kit (SDK).

>> The bottom line.

With AvaTax ST, you get the "big business" protection of sales tax automation without breaking your budget, straining your internal resources, or compromising on functionality. Between the peace of mind of sales tax compliance and the cost benefits of dramatically streamlined order-entry and remittance processes, **AvaTax ST will be the best technology investment your business makes this year.**

Avalara. Making sales tax less taxing.

AvaTax ST™: Small investment, big return. Peace of mind.

Enterprise-class capabilities at a price *any* business can afford.

>> Comprehensive, always-accurate calculation

A correct sales tax calculation starts with identification of all applicable taxing jurisdictions to a street address. For every calculation, AvaTax ST performs address verification, then locates the exact street address within a jurisdiction using a geocoding mapping system. The calculation is made, referring to pre-set user configurations including nexus, tax jurisdictional issues, exception processing, product taxability rules, sourcing rules, split rates, and maximum tax. All of this happens transparently in the background, automatically updating your accounting application.

>> Automated reporting and returns-generation

Easily-accessible user interface and reporting platform provides detailed, summary, and exception reports to exceed statutory tax return requirements. Views and drill-downs encompass customer/invoice, product, reason for exemptions, jurisdictional information

and a detailed breakout of rates and taxes by jurisdiction.

An incorporated returns platform provides sophisticated selection of required forms, pre-population of tax data for a specified filing period, and intelligent calculations within the form. A revision /approval process is included, permitting AvaTax ST to maintain records of adjustments.

>> Seamless integration with:

QuickBooks®	ACCPAC Advantage Series™
Great Plains®	MAS 90® and MAS 200®
Navision®	MS E-Commerce Server
iScala®	

Or, any other accounting or e-commerce application by custom integration, with AvaTax On-Demand™.
